

TECH II (WATER SYSTEMS) – OAHU OFFICE

Pural Water Specialty Co., Inc. is a niche company in the water industry that focuses on a broad spectrum of work from managing water systems, boiler services, chemical treatment, construction, and design/build water treatment plants and pump systems. We are an experienced State of Hawaii licensed contractor providing services for potable and non-potable water systems, water management services and specialty services.

Our services and programs are designed to optimize our customer's total water/process system performance and protect the environment through water and energy management and conservation.

JOB SUMMARY:

Performs a variety of operations, maintenance and repairs for potable and non-potable water and distribution systems.

PRIMARY RESPONSIBILITIES:

- Assists with the operations, maintenance, and repair activities of water and distribution systems including but not limited to wells, pumps and distribution piping, valves, fire hydrants and flow control devices.
- Performs operations, maintenance and repair activities related to assigned areas, water and water distribution systems including but not limited to water supply springs, wells, pumps, water catchments and storage systems, water filtration treatment plants, distribution piping, valves and flow control devices as assigned.
- Conducts quality control checks upon completion of the job and reports to the contractor or client.
- Makes daily operations and maintenance inspections of assigned areas such as checking chemical feed systems, water collection and storage sites, water filtration treatment plants, and facility distribution system components.
- Installs flow meters, and backflow/cross connection prevention assemblies as assigned.
- Assists in the chlorination and de-chlorination of new and retro-fitted water lines.
- Conducts water sampling of water wells and performs chemical analysis.
- Collects and forwards water samples to certified laboratories for testing to ensure compliance with regulatory agencies.
- Prepares weekly and monthly water consumption reports for subdivisions water committee as assigned.
- Provides a monthly water usage report for invoicing of customers to Team Leaders.
- Performs assessments on all water and distribution systems and makes recommendation to Team Leader or Operations Manager.
- Working knowledge of water systems and distribution systems.
- Skill in time management to meet deadlines and goals.
- Ability to problem solve with minimal supervision.

MINIMUM REQUIREMENTS/QUALIFICATIONS

- High School diploma, GED, or the equivalent of a GED and 2 years of related work experience or equivalent work experience and training.
- Minimum 2 years recent related work experience in water systems and distribution systems.
- Current valid driver's license with a clean driver's abstract.
- Class I or II Distribution System Operator and/or Water Treatment Plant Operator certification.
- Technical knowledge of water distribution systems or related industry.
- Excellent written and oral communication skills.
